DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, 23-33, and 36-38, drawn to a protein database and method of developing said protein database, classified in class 702, subclass 19.
 - II. Claims 19-22, 34, and 35, drawn to a method of identifying a protein fold, classified in class 702, subclass 19.
2. The inventions of Groups I-II are distinct inventions because they are directed to different methods regarding the critical limitations therein. For Group I, the critical feature is a method of identifying a protein fold without requiring a database. For Group II, the critical feature is a system for developing a protein database and method requiring said database for identifying protein fold. The completely distinct critical features of each Group support the undue search burden if they were examined together.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1631

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1.
